MODULE SYLLABUS

IT PROJECT MANAGEMENT

1. Module code: INS3044 (Compulsory ☒ / Elective ☐)

2. Credit(s): 3

3. Prerequisite(s): *None*

4. Teaching language(s): English

5. Program: Undergraduate, Major : Management Information System

Faculty in charge: Faculty of Applied Sciences

6. Lecturers' information:

N o	Name	Title/Qualification	Email	Cell phone
1.	Nguyễn Phương Anh	Dr	phuonganh.h.nguyen12@gmail.com	0904969645
2.	Do Tien Thanh	MS	thando@vnuis.edu.vn	0937150786

7. Module objectives: (*general objectives, specific objectives: knowledge, skills, attitude*):

The main aim of the course is to develop IT project management for students. Specific objectives are that this course provide analytical and research skills for a future IT project administrator, or IT engineer, or system architect, to take a leading role in application and management of the construction of business systems for students.

For knowledge,. Students will gain knowledge on planning and managing IT projects, including work division, estimation, planning, scheduling, and implementation. The module aims to enhance

students' ability to manage small to medium-sized projects while fostering qualities like autonomy, responsibility, perseverance, flexibility, confidence, creativity, and professional ethics. This comprehensive approach ensures students are well-equipped to face challenges and succeed in IT project management roles

For skills and attitude, students can develop further on the capacity of work division, work estimation skills, planning skills, scheduling and implementation skills. Students understand and apply project management tasks for the small and medium-size projects. Students also develop their autonomy and responsibility levels.

8. Learning outcomes:

By successful in this module, students will be able to:

8.1. Knowledge

COURSE LEARNING OUTCOME S (CLO)	DETAILS	PROGRAM LEARNING OUTCOMES (PLO)
CLO 1	APPLY the principles of project management;	PLO 4
CLO 2	IMPLEMENT management of scope, human resource, time, and cost in projects	PLO 4
CLO 3	IMPLEMENT management of integration, risk, quality, and procurement in projects	PLO 4

8.2. Skills

** Professional skills*

CLO	DETAILS	PLO fulfillment
CLO 4	IMPLEMENT different systems effectively and appropriate decisions for project implementation;	PLO 6
CLO 5	USE the tools/processes/techniques effectively which are developed for an IT project;	PLO 6

CLO 6	PERFORM risk analysis and contingency plans;	PLO 6
CLO 7	PERFORM the overall evaluation of the implementation of the entire project.	PLO 6

** Soft Skills*

CLO	DETAILS	PLO fulfillment
CLO 8	IMPLEMENT overall project plans;	PLO 9, 10

8.3. Level of Autonomy and Responsibility

CLO	DETAILS	PLO fulfillment
CLO 9	DEVELOP good moral qualities, appropriate personal qualities such as willingness to face difficulties and take risks, perseverance, flexibility, confidence, hard work, enthusiasm, passion, self-control, integrity, criticism, desire for improvement and innovation, creativity, responsibility and initiative in work.	PLO 12, 13

9. Assessment methods

No .	Assessments (items and methods)	Proportion	Description	CLO fulfillment	PLO fulfillment
1	Regular Assessment	10%	- It is important for students to attend all classes and to be punctual. - Students who are 10 (or more) minutes late will be counted as “absent” for that class. Each unexcused absence results in a deduction of 1% in the 10% for attendance. Students who have a	CLO 1-9	PLO 12, 13

No .	Assessments (items and methods)	Proportion	Description	CLO fulfillment	PLO fulfillment
			“zero” for “attendance” will not be allowed to take the final exam. - 80% of the grade comes from attendance, and 20% comes from in-class assignments.		
2	Midterm Assessment	30%	Details on the mid-term exam will be announced by week 5. It is a written practical test or group presentation.	CLO 1-9	PLO 4, 6, 9, 10
3	Final exam	60%	Project and presentation Students choose and complete a project based on a real case study to solve problems by using knowledge and skills from this course.	CLO 1-9	PLO 4, 6, 9, 10
	Total	100%			

Scoring method:

- Module evaluation scores are graded on a 10-point scale (from 0 to 10), rounded to 0.1
- The module score is the sum of three component scores multiplied by the respective proportion

10. Required textbook(s) and recommended books

10.1. Required textbook(s):

[1] John M. Nicholas, Herman Steyn, 2021, Project Management for Engineering, Business and Technology, 6th Edition, ISBN: 9780429297588

Tool: Microsoft Project, JIRA, Trello and other equivalent tools.

10.2. Recommended text(s):

[1] Clifford F. Gray, Erik W. Larson, Gautam V.Desai, 2014, Project Management: The Managerial Process, 6th Edition, McGraw-Hill/Irwin, ISBN-13: 978-9339212032.

[2] Kathy Schwalbe, 2018, Information Technology Project Management, 9th Edition. Course Technology - Cengage Learning, ISBN-13: 978-1337101356.

11. Module description

This module introduces essential concepts, systems, and technologies for managing information system projects effectively. It covers the complete project lifecycle, from requirements analysis to project implementation, focusing on techniques to control costs and schedules. Students will engage in lectures, case studies, research projects, and group discussions to develop key project management skills.

Topics include project integration, scope, time, cost, quality, human resources, communication, risk, and procurement management. Students will have abilities to apply some project management tools such as Microsoft Project, JIRA or other similar tools into a project in practice. By the end, students will be equipped to manage small to medium-sized IT projects successfully, applying both theoretical and practical knowledge.

12. Course schedule

- + Concepts and techniques are introduced in a weekly three-hour active-learning lecture.
- + Classroom lectures combine with discussion and class assignments, homework;
- + Students present the solution of exercises on the board.

Note:

One credit is equivalent to 50 learning hours including class visit hours, guided learning hours, self-study, research, experience and assessments; for teaching in the classrooms, one credit requires at least 15 lecture hours or 30 tutorial, experiment, discussion hours, one teaching hour in the classroom counts for 50 minutes.

According to the Academic Framework:

Tutorial: Tutorial, experiment, discussion

Self-study: Assessed internship, research, self-study
